

Social Services

No.	Name of Equipment (in English)	Function	No. of Beneficiary	Quantity	Unit Cost
C1	Shower Trolley	It facilitates efficient showering and hygiene care routines for individuals, who need to remain in a lying position.	50	1	35,000
C2	Electric Nursing Bed	This type of bed is easy and safe for service user to sleep and do some daily life activities easily through electric remotor controler, lessening nursing daily routine for both users and caregivers.	20	20	200,000
C3	Professional Compression Therapy System	Different pressurization modes can combine for different treatment protocol which can improve blood circulation, stimulate the lymphatic system, reduce edema, and relieve tension.	10	1	36,000
C4	CPR Training Dummy	It facilitates CPR drill and examination for the nursing staff.	150	1	11,000
C5	Electric Hospital Bed	Ultra-low bed height (to prevent falls), wooden (to enhance home feeling), the bed head, the bed end and the height are electrically raised and lowered (for the convenience of health care)	15	3	23,000
C6	Electric Mobile Hoist	It facilitates the transferring of residents (from bed to wheelchair/to toilet/to bath).	30	1	34,000
C7	Thera-Trainer Tigo 538 (Total Body Active / Passive Trainer)	The Thera-Trainer has different training modes (Neurological /Orthopeadic /Cardiological training modes, anti-spasm function, constant workload program, and symmetric training, etc), which enables the elderly to exercise their upper and/or lower limbs with active or passive training. It also has a colour screen display, biofeedback system, arm rest and foot fixing device, tip-up protection for wheelchair from tilting. It helps the elderly to maintain the flexibility of joints, enhance concentration, workout satisfaction and safety. Therefore, it is particularly suitable for people with dementia, stroke, parkinson's disease, brain damage, cerebellar degeneration, joint replacement, and mobility problems with wheelchair bounded elderly.	60	1	60,000
C8	Vital Sign Monitor	It can monitor the blood pressure, pluse and SpO <sub>2</sub> .	155	3	10,000
C9	Electric Shower Trolley	It facilitates the bathing for bedridden elderly.	30	3	50,000
C10	Electric Shower Chair	It facilitates the bathing for chair-bound elderly.	100	3	48,000
C11	Bioptron Light Therapy System with floor	It generates polarized light to activate the humun body, e.g. increasing the number of neutrophil, protein ,macrophage and collagen production in different wound healing phases. It also can relieve pain.	30	1	40,000

No.	Name of Equipment (in English)	Function	No. of Beneficiary	Quantity	Unit Cost
C12	ITO 4 channel electrotherapy/ ultrasound	Electrotherapy and ultrasound are effective modalities for inflammation and pain control, and promotion of soft tissues healing. It is particularly useful for chronic pain management and facilitates recovery from injuries.	50	1	79,800
C13	Temi	Temi can truly interact with humans while providing video calls, AI, face recognition and voice control. Temi's wide variety of communication methods allow it to offer entertainment and multimedia information to our residents through speech, videos running on its display, music played by its speakers. Our residents can receive the updated information such as weather reports, reality-orientation (date, time and place) and allow them to request for songs. Moreover, Temi allows the video calling platforms to maintain our residents' existing relationships with family and support the development of a stronger sense of connection. Temi's AI and advanced indoor navigation technology can function as patrolling, greeting guests and guiding people to specific locations.	94	1	45,000
C14	Shower Trolley (3/F, 5/F)	Residents who are bedbound for a long time require high levels of care to provide stability, safety and be transported to a suitable environment in a supine position for bathing. This equipment can also facilitate the staff to do residents' bathing under safe working conditions to avoid neck and back strain.	80	2	25,000
C15	Pharmacy Refrigerator (2/F - 5/F)	It is used to refrigerate medicines and can accurately control the temperature. Automatic alarm system: high and low temperature, unclosed door, etc. Digital temperature display, easy to monitor temperature, with door lock function, easy to manage.	200	4	15,000
C16	Electric Medicine Grinder(1/F - 5/F)	Fast and convenient. Safe and prevents spills and cross-contamination of drugs. Avoid repetitive strain injuries.	250	6	4,000
C17	standing wheelchair	To assist the elderly with muscle weakness and the hemiplegic to gain strength and preserve their physical fitness and health. Passive standing can reduce spasticity, improve orthostatic hypotension, bowel function, range of motion of the major joints of lower limbs and spine. Also, to reduce the strain of transfer and to enhance the self-esteem and confidence of the elderly.	20	1	30,000
